#### (U) Georgia – Arby's Breach May Have Hit 355,000 Credit Cards

(U) Atlanta – Malware on cash registers at Arby's fast food restaurants may have resulted in the breach of more than 355,000 credit and debit cards. The incident was first reported by security researcher and writer Brian Krebs and may have affected cards used at hundreds of the chain's restaurants. Only Arby's restaurants owned by the Atlanta, Georgia-based company were affected, not its franchises. The malware allowed attackers to remotely steal data from each credit card as it is swiped at the cash register. This is the same type of point-of-sale attack behind the mammoth credit card breaches at Target and Home Depot.

He was one of six young men in New York and New Jersey charged in a probe into what Assistant US Attorney Alexander Solomon called a "group of like-minded individuals who had pledged allegiance to ISIL."

#### (U) Brazil – Over 100 Dead as Police Strike Spurs Anarchy

(U) Vitoria – More than 100 people have been reported killed during a six-day strike by police in the Brazilian state of Espirito Santo, as hundreds of troops patrolled streets attempting to keep order with schools and businesses closed and public transport frozen. The Army mobilized airborne troops and armored vehicles to reinforce roughly 1,200 soldiers and federal police trying to contain the chaos in Espirito Santo, a coastal state north of Rio de Janeiro. Authorities reported they cannot establish definite motives for these killings at this time as the crisis is still ongoing, but an initial evaluation by the homicide division seems to indicate that a majority of those who have died were tied to drug trafficking or some other type of crime.
